Digizilla Assesment

This report provides an overview of the Digizilla Odoo Module, a custom module developed for Odoo v17 Community Edition. It enables management of records through organized views, chatter tracking, and UI customizations using XML and JavaScript.

Module Overview

1- Project structure:

```
digizilla_module/
├── __init__.py
├── __manifest__.py
├── odoo.conf
├── models/
│   ├── __init__.py
│   └── digizilla.py
├── views/
│   ├── digizilla_views.xml
│   └── digizilla_menus.xml
├── static/
│   └── src/js/hide_create_button.js
└── security/
    ├── ir.model.access.csv
```

2- Views (List, Form, Kanban):

The module defines three main views for displaying Digizilla records: List View: Displays list of records with key fields. Form View: Provides detailed editing interface with multiple tabs. Kanban View: Visual card-based layout for quick overview.
